

Bricks and Pieces

A Digital Detox

March 12-14, 2027

Bricks and pieces is a weekend about building, creating, and letting your imagination be in control ! Dan the Lego Man will be joining us for a full weekend of LEGO fun, challenges, and creative builds. We will also get crafty with Kim while making colorful mosaics and exploring different ways to make something amazing. There will be plenty of time for games, challenges, and other activities throughout the weekend, especially without our phones distracting us. Weather you are a LEGO master like Dan or just enjoy creating things, there is something for everyone. Come ready to create, compete, and build something awesome!
